## SPRING COLLECTION '20

Four dresses, four women, four generations and four elements of life: fire, water, earth and air.

The dress is designed to fit different female figures. The belt, which can be put on or taken off the dress as desired, is a small work of art with hand-painted motives on silk. Because of this, each dress is unique and no two painted silks are identical.

Dress colors: red, blue, beige, grey

Dress material: benetton

Belt material: silk

# 2020-2023

## MORE THAN FASHION

The DANEL story began in March 2020. The first products out there were hand-painted silk scarves, which became an integral part of other collections that followed them.

In the next three years, all the steps of the DANEL studio were aimed at enriching the Bosnian fashion scene, stepping outside the framework of the standard and providing an opportunity for young BiH talents to create big stories, together with our small team.

The following pages are a small part of the projects, inspired by the brave women of Bosnia and Herzegovina, which we created together with these talented and motivated people.
